be YOU!

Security Framework

MANAGING USERS AND GROUPS

Security Framework

Validates access credentials before serving a request (web page, component, etc)

3 Access Categories: **Always Allowed**, **Always Denied**, and **Requires Login**

Requires Login: Access determined by the logged in user's group membership

Security Feature Overview

Login/Logout

Users/Roles

Account Locking

Forgot Password/Reset Password

Restrict access to Pages, Components, Controls, or Fields

Security Feature Overview

Two-factor Auth

Persistent Login

Alternative Login

Extended User Info - for extra details

API for server-side scripts

Users and Groups

User

- An account with a username and password used to log into your application

Group

- Also called "Role"
- Is assigned to one or more Users
- Used to restrict access to a page, component, or control in the development environment

Managing Users and Groups

Create a UI to manage users & assign groups

Seed users & groups

Updating groups

Integrating the new security ux templates into an existing app

A black and white photograph featuring a microphone on a stand in the foreground, angled towards the right. To the left, a portion of a piano keyboard is visible. The background is heavily blurred, showing out-of-focus lights and what appears to be a person's hand near the keyboard. The text "Live Demo!" is overlaid in a large, white, sans-serif font on the left side of the image.

Live Demo!
